Dianeal PD solutions: Trusted performance

The information contained in this page is intended for Indian healthcare professionals only.

The first commercial Continuous Ambulatory Peritoneal Dialysis (CAPD) solution, **Dianeal** solution continues to offer reliable results for dialysis patients based on 30 years' trusted experience.

The information provided is not intended to be a substitute for professional medical advice. A licensed healthcare professional should be consulted for diagnosis and treatment of any and all medical conditions.

Your doctor may prescribe **Dianeal** as one of your solutions for Peritoneal Dialysis (PD). **Dianeal** was the first Peritoneal Dialysis (PD) solution on the market and continues to offer benefits including:

- 30 years on the market, with a trusted track record
- Proven reliability
- Availability in low-calcium and PD -2 solution offerings

Dianeal Ambuflex Indication

Dianeal peritoneal dialysis solutions are indicated for use in chronic renal failure patients being maintained on peritoneal dialysis. Peritoneal dialysis is indicated for patients in acute or chronic renal failure when nondialytic medical therapy is judged to be inadequate

Dianeal Ultrabag Indication

Dianeal peritoneal dialysis solutions in UltraBag containers are indicated for use in chronic renal failure patients being maintained on continuous ambulatory peritoneal dialysis when nondialytic medical therapy is judged to be inadequate.

Important Risk Information

Not for Intravenous Injection

Use aseptic technique. Contamination of Luer lock connector may result in peritonitis

Adverse reactions to peritoneal dialysis include mechanical and solution related problems as well as the results of contamination of equipment

Solution-related adverse reactions may include peritonitis, electrolyte and fluid imbalances, hypovolemia, hypervolemia, hypotension, hypertension, disequilibrium syndrome, allergic symptoms, and muscle cramping.

Please refer to the full prescribing information
